# JAIME VÉLEZ ESCANDÓN

## Telematics Engineer

AUTOMATION · APPLIED AI · DIGITAL GOVERNMENT

jaimevlz306@gmail.com · Yumbo, Valle del Cauca
linkedin.com/in/jaime-velez-escandon · github.com/jaimevlz · jaimevlz.github.io/resume

## PROFILE L-01

Telematics Engineer with 8+ years designing, implementing and operating IT services in the Colombian public sector. I coordinate technology management at a public utility company: infrastructure, information security and privacy, digital government and regulatory reporting.

Alongside that, I build AI-powered automation: multichannel conversational agents, integration workflows, KPI dashboards and management apps that cut paperwork and response times.

## EXPERIENCE L-02

### IT Lead — Information Systems

Dec 2019 — Present

ESPY S.A. E.S.P. (public utility) · Yumbo

I coordinate IT, information security and privacy, and regulatory reporting (SUI); I manage ERP, document management and infrastructure.

- Wrote and updated the IT Strategic Plan (2019–2025), the Information Security Plan and the Security Risk Treatment Plan (2020–2025).
- Authored the Information Security & Privacy, Personal Data, Digital Government, Digital Security and Transparency policies.
- Security and digital government improvement plan addressing ISO 27001, FURAG (MIPG) and external audit findings with no-budget actions.
- Web accessibility compliance (WCAG 2.1) for the institutional website and technical support to IT contract supervision.
- Migrated services to the cloud (Oracle Cloud and AWS), led the telemetry project and a secure internet + backup rollout.

### IT Lead (contractor)

2019

ESPY S.A. E.S.P. · Yumbo

Led IT and regulatory reporting; deployment, support and upgrade of equipment and infrastructure.

- Uploaded and certified 444 of ~800 regulatory reports pending since 2006.

### Network & Services Engineer (contractor)

Jul 2018 — Oct 2019

Yumbo Mayor's Office · Yumbo

Network, systems, infrastructure and IT services support.

- Deployed a Zabbix monitoring server and a private cloud on OpenStack.
- Set up the database server and an automated NAS; migrated on-premise services to Azure IaaS.

### Services Engineer (internship)

Nov 2017 — May 2018

EMCALI Telecommunications · Cali

Support to IT, projects and telecom services.

- Built a Telegram bot for automated monitoring reports (Node.js + Telegram API).
- Integrated Zabbix with Grafana, managed AWS IaaS and wrote an LDAP reader in Java.

### Independent consultant & developer

2014 — Present

Own and client projects · Remote

Web, mobile and desktop apps; since 2024, process automation and applied AI.

- AI agents, integrations and dashboards (see Projects).

## SELECTED PROJECTS

L-03

*Projects described without client names for confidentiality.*

P-01 **AI assistant for citizen services** · *Public utility company*

Conversational agent on web, WhatsApp (unofficial API and Meta's official Cloud API) and Telegram. Files complaints and outage reports with a tracking number, reports service status and news from live documents, and delivers bills by contract number. Available 24/7, including after office hours.

Stack: n8n · Gemini · PostgreSQL · Redis · WhatsApp Cloud API · Telegram Bot API · Google Workspace

P-02 **Complaints & outage management panel** · *Public utility company*

Web app with email-based access and roles (case handler, operations, supervisor, IT) to process what the assistant files. Business-day deadlines with Colombian holidays, automatic assignment, bulk actions, heatmap and trend treemap by neighborhood.

Stack: Google Apps Script · JavaScript · Google Sheets · n8n

P-03 **Self-hosted automation platform** · *Own infrastructure*

n8n in queue mode (main, worker and runner) with Redis, PostgreSQL and a PDF service, deployed as containers. Nightly database backups to S3-compatible storage and zero-data-loss upgrades.

Stack: Docker · Railway · n8n · Redis · PostgreSQL · Gotenberg · Cloudflare R2

P-07 **Public planning dashboards** · *Local governments*

Interactive dashboards tracking a municipal development plan (goals, investment projects, physical and financial progress) and a 2020–2025 management and results plan.

Stack: HTML · JavaScript · Material Design 3 · Google Sheets

P-08 **Master data cleansing & tax reporting** · *Large industrial company*

Validation engine over ~240,000 third parties: tax ID check digit (mod 11), deduplication, cross-system reconciliation and programmatic audit of the national tax authority's third-party reporting formats.

Stack: Python · pandas · openpyxl · lxml

## SKILLS

L-04

**AI & AUTOMATION**

n8n (queue mode) · LLM agents (Gemini, Claude) · Prompt engineering · WhatsApp Cloud API · Telegram Bot API · Google Apps Script · Lovable

**DEVELOPMENT**

JavaScript / Node.js · React · Python (pandas) · SQL / PostgreSQL · Bash · Java · PHP · HTML / CSS

**CLOUD & INFRASTRUCTURE**

Docker · Railway · Cloudflare (Workers, R2, DNS) · AWS · Oracle Cloud · Azure · Google Cloud · OpenStack · Proxmox · VMware ESXi · Terraform · Vagrant · Redis

**NETWORKS & SERVICES**

Switching & routing · DNS / DHCP · Active Directory · Email (SPF, DKIM, DMARC) · Zabbix + Grafana · Wireshark · GNS3

**GOVERNANCE & SECURITY**

MIPG / FURAG · ISO 27001 · IT strategic planning · Data protection (Law 1581) · WCAG 2.1 · Regulatory reporting

**DATA & DESIGN**

HTML/JS BI dashboards · Advanced Excel · Google Sheets · Illustrator · Photoshop

## EDUCATION

L-05

**B.Eng. Telematics Engineering** Universidad Icesi, Cali · 2012 – 2018

Thesis: evaluation of large-scale, container-based infrastructure monitoring tools.

**Graphic Design technical program (4 semesters)** Fundación Academia de Dibujo Profesional

**English B2 (upper intermediate)** Universidad Icesi
